XMC

FOR DELIVERY DISTRIBUTION

XMC is a platform built by ERP experts to create the ultimate integration of Delivery Distribution operations with the rest of your ERP, XMC is ready out-of-the box for Acumatica, Sage X3 and Sage 100.

XMC PLATFORM

XMC SUPPORTS THESE MODELS

- **Route Delivery:** distribution companies complete ad-hoc delivery to their customers of pre-existing orders.
- **Direct Store Delivery (DSD):** businesses that typically supply grocery and convenience stores. DSD driver responsibilities may include selling, marketing, and merchandizing.
- **Route & Van Sales:** vehicles are loaded with expected daily demand, and customers are sold and serviced, usually following pre-established stop orders.
- **Hybrid:** loading vehicles with a mix of pre-sold orders and extra stock for additional sales along the route.
